Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The newly added limitation will be given due consideration. The examiner considers that the phrase "essentially consisting of" does not exclude other components from the coating layer. Although Goto et al. teach an epoxy resin in addition to titanium dioxide in the coating layer, there is no exclusion of the attraction of atmospheric water to the titanium dioxide. The epoxy resin may allow water permeate to the titanium dioxide near the surface of the coating layer. Therefore, Goto et al. do teach the claimed invention. The limitation "essentially consisting of titanium dioxide" may be considered as new matter in the next Office Action.
